

Assignment 4

Designing a Legally and Ethically Responsible Technology Company

Course: Professional Issues in IT
Submission Format: PDF Report, Organizational Chart, and Presentation Slides
Group Size: 3–4 students
Deadline: You need to submit and bring hard copies before your presentation slot

Your presentation slot : [Teams CS392-A.xlsx](#)

1. Assignment Overview

This assignment requires your group to design a fictional technology company and its professional framework from the ground up. You will create the actual policies and structures that govern a modern IT venture and present your "startup" to the class in a high-impact pitch. (You can either choose the company you wrote MOA for, or you can choose from scratch)

2. Required Sections

Section 1: Company Overview (10 Marks)

- Choose a domain: **FinTech, AI Recruitment, HealthData, or Cybersecurity.**
- Provide a company name and mission statement.
- Describe the core product/service and the target market.
- Explain the business model (e.g., SaaS) and its necessity in the Pakistani market.

Section 2: Organizational and Legal Structure (10 Marks)

- Legal Entity: Choose and justify a structure, either a Partnership (governed by the Partnership Act 1932) or a Private Limited Company.
- Management: Define key roles (CEO, CTO, Legal/Compliance, etc.) and provide a clear organizational chart.

Section 3: Intellectual Property (IP) Strategy (15 Marks)

- Detail how you will safeguard "intangible property".

- Differentiate between elements protected by Copyright (source code, UI) and those requiring Patents (proprietary algorithms) under Pakistani law.
- Outline plans for Trademarking and securing Domain Names.

Section 4: Employee and HR Framework (10 Marks)

- Draft a summary of an Employment Contract, including job responsibilities and confidentiality clauses.
- Ethics & EDI: Include an "Inclusion and Harassment Policy" complying with the Protection against Harassment of Women at the Workplace Act 2010.

Section 5: Data Protection and Privacy (15 Marks)

- Design a privacy framework: explain data collection, storage, and how you obtain User Consent.
- Identify data breach risks and mitigation strategies.

Section 6: Ethical Risks and Professional Integrity (15 Marks)

- Identify two major ethical dilemmas (e.g., AI Bias or User Data Misuse) and relate them to the BCS Code of Conduct.
- Propose concrete solutions to mitigate these risks.

Section 7: General Legal Risks (10 Marks)

- Identify broader threats such as Cybersecurity incidents or Consumer Protection issues and how your framework prevents them.

Section 8: Company Pitch Presentation

- The Task: Deliver a 5-minute presentation to the class "pitching" your company as a legally and ethically sound venture.
- **Requirements:**
 - Clearly explain the product and its market value.
 - Highlight your IP and Data Protection strategies.
 - Demonstrate how your company aligns with the Pakistan Software Export Board (PSEB) goal of reaching US\$ 15 billion in IT exports.

Evaluation: Based on clarity, professionalism, and the ability to defend your company's ethical standing and

3. Report Requirements

- **Length:** 10- 12 pages.
- **Formatting:** Times New Roman, 12pt, 1.5 spacing.
- **Submission:** PDF Report + Organizational Chart + Presentation Slides.
- **On the presentation day:** get a hard copy of your report as well as presentation.

Rubric:

Component	Criteria
I. Written Report Quality	
Section 1: Company Overview	Clear mission; product is innovative and addresses a specific gap in the Pakistani tech market.
Section 2: Organizational Structure	Professional justification for choosing a Partnership vs. Private Limited Company; includes a detailed org chart.
Section 3: IP Strategy	Accurate distinction between Copyright and Patents under Pakistani law; comprehensive brand protection plan.
Section 4: HR & Compliance	Contract includes all vital clauses (liability, termination); EDI policy strictly adheres to the 2010 Harassment Act.
Section 5: Data Privacy	Identifies realistic data risks; proposes clear consent and storage protocols aligned with professional standards.
II. Core Concept Integration	
Breadth of Syllabus	Demonstrates deep understanding of at least 5 major areas (Law, Finance, IP, HR, Ethics, and Data Protection).
Application of BCS Code	Ethical dilemmas are directly linked to specific clauses of the BCS Code of Conduct with viable mitigation strategies.
III. Pitch Presentation	

Delivery & Impact	High-impact 5-minute delivery; uses professional slides; effectively communicates value to non-technical stakeholders.
Strategic Alignment	Explicitly demonstrates how the startup contributes to the PSEB national target of US\$ 15 billion in IT exports.
